

AMENDMENT

Kindly **amend** the application, without prejudice, as follows:

In the Claims:

Kindly **add** new claims 10 - 14 as follows:

10. A touch input device, comprising:
a substrate having a first planar surface and a second planar surface;
an acoustic wave transducer for generating acoustic waves, the
acoustic wave transducer coupled to the second planar surface such that
generated acoustic waves are transmitted to the first planar surface;
planar wiring applied to the second planar surface; and
means for connecting the planar wiring to the acoustic wave
transducer.
11. A touch input device as recited in Claim 10, wherein the means for
connecting the planar wiring to the acoustic wave transducer comprises a
discrete connector.
12. A touch input device as recited in Claim 10 wherein the planar wiring
comprises a composite conductive material.
13. A touch input device as recited in Claim 10 wherein the planar wiring is
applied by transfer printing.
14. A touch input device as recited in Claim 10, further comprising a linear
array of acoustically reflective elements on the first planar surface and
wherein the planar wiring resides on a portion of the second planar surface
substantially opposite to the linear array of acoustically reflective elements.
